1 Limericks

There once was a man in a village
Who wanted to study a new language.
    There soon came an addiction,
    With boolean, no fiction,
Poor man got a java caused hemorrhage.

O' the beloved for loop
That is used by every age group.
    But don't forget the while
    Lest you don't fear Kyle,
As he will drown you with turtle soup.

In java there is a class.
You must know of this in order to pass.
    But here is a hint,
    A number is an int.
Now you know java, don't step on some glass.
